About Us

Acteol is a CRM enterprise solution for the hospitality, retail and leisure sectors that helps operators track every guest interaction to create a powerful Single Customer View.

We work closely with our hospitality customers to help them better understand their customers data and deliver more effective sales and marketing campaigns with a better ROI.

Social Ads Dashboard

Build a Web Application that helps marketers and digital agencies to easily report, automate, and optimise social campaigns (Facebook, Google).

Create custom dashboards to track and measure the metrics that matter to marketers in one view.

With direct API integrations across Facebook and Google, advertisers can improve ad performance, save time, and increase return on ad spend (ROAS)

Social Ads Dashboard

Tasks To Do:

- Draft functional and technical specifications

- Develop Web APIs to interact with Facebook and Google APIs and to interact with the Database.

- Develop Web APIs to:
  - Connect social ad accounts
  - Display and manage dashboard reports
  - Share dashboards between application users
  - Schedule broadcasting reports to subscribed users
  - Manage an alert system that triggers notifications based on social metrics

Further Details
